MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objectives and Strategies

The Sun Life Sentry Global Mid Cap Fund (the "Fund") seeks to achieve long-term capital appreciation primarily by investing directly in a diversified portfolio of medium capitalization global companies or indirectly by investing in mutual funds that invest in such securities.

The Fund's sub-advisor is Sentry Investments Inc. (the "sub-advisor"). In pursuing the Fund's investment objectives, the sub-advisor invests primarily in the equity securities of medium capitalization global companies and, to a lesser extent, equity securities of small and large capitalization global companies. The sub-advisor employs a fundamental, bottom-up approach to investing to identify companies that have a high return on invested capital, generate free cash flow and have modest capital expenditure requirements.

Risk

There were no changes in the Fund's investment objective or strategy during the period which materially impacted the overall level of risk in the Fund. The risks associated with investing in the Fund remain as outlined in the Fund's Simplified Prospectus.

Results of Operations

During the period, the net asset value of the Fund increased from \$29.6 million to \$57.5 million. The increase in net asset value was attributable to positive net sales, as well as positive performance during the period.

During the period, the Fund returned 2.3% for Series A units. This result lagged the Fund's benchmark, the MSCI ACWI Mid Cap C\$, which returned 3.5%. The performance returns for other series of this Fund are similar to those of Series A except for differences in expense structures. Please refer to the 'Past Performance' section of this report for performance of each series.

During this eventful period in which investors were taken by surprise on many occasions, the Fund and the benchmark performances were similar. In the first part of the year, the Fund underperformed on a relative basis as its overweight

positions in the U.K. and Europe detracted from relative performance. However, the decision to add Great Britain Pound/U.S. Dollar and Euro/U.S. Dollar currency hedges in the days leading up to the "Brexit" vote (the referendum on whether or not the U.K. would exit the European Union), as well as the Fund's relative overweight in Canada, along with strong stock selection in the U.S., helped offset some of the volatility of the Fund's U.K. and European holdings. In the second half of the year, the Fund's outperformance relative to the benchmark was partly attributable to a relative overweight in Canada and to stock selection in U.S., U.K., and in Canada.

On an absolute basis, the top sector contributors to performance included the Industrials and Consumer Discretionary sectors. Conversely, the Health Care sector detracted the most from performance. At the end of the period the largest sector exposure was in the Consumer Discretionary sector, with a weight of 32.1%, the Industrials sector, with a weight of 26.0%, and the Health Care sector, with a weight of 10.7%.

The largest country exposure was in the U.S., with a weight of 23.3%, U.K., with a weight of 20.9%, and Canada, with a weight of 17.9%. At the end of the period, the Fund held 43 securities, and the cash weight was 4.0%.

Recent Developments

Calendar 2016 ended up being another positive one for the world markets, which recovered after falling during the first months of the year. By mid-January, global equities had completely retraced the gains made in the fourth quarter of 2015, as heightened market fears of an economic slowdown in China and a deepening oil crisis weighed on global markets. After bottoming in mid-February, markets rebounded somewhat and remained range-bound until June, buoyed in part by further interest rate cuts and quantitative easing measures announced in Japan and Europe, and by the U.S. Federal Reserve's decision to defer a previously anticipated rate hike. However, growing concern over the U.K.'s June 23 Brexit vote generated significant volatility in the preceding three weeks. While confidence in a "remain" vote in the days leading up to the referendum prompted a brief recovery in U.K. and European equities, the actual vote to exit caught investors by surprise, prompting a broad sell-off in European and Asian markets and sending market participants into

Sun Life Sentry Global Mid Cap Fund

safe-haven asset classes (utilities, real estate, the Japanese Yen and U.S. Dollar) and regions (e.g., the U.S. and Canada).

Once again, markets then proved to be resilient and climbed during the third quarter of 2016 as the continued low-interest-rate environment propelled global equity markets in a “risk-on” rally. With regards to the U.S., the result of the presidential election surprised many. Initial post-election bitterness was quickly replaced by optimism as investors expected that President-elect Trump’s pro-growth policies would stimulate the economy, which helped drive global equity markets to a solid finish in 2016.

Effective February 5, 2016, all Series E units were redesignated to Series A units, under the Front End Sales Charge option, of the same Fund. Please refer to the Fund’s simplified prospectus for more details about the captioned change and for details about the Private Client Program.

Related Party Transactions

Sun Life Global Investments (Canada) Inc. (the “Manager”) is the manager, trustee and portfolio manager of the Fund.

The Manager is responsible for the provision of all general management and administrative services required by the Fund in its day-to-day operations, including providing or arranging for the provision of investment advice, bookkeeping, recordkeeping and other administrative services for the Fund.

As trustee, the Manager holds legal title to the Fund’s investments in trust for unitholders. For its services, the Manager receives a management fee that is calculated as a percentage of the average net asset value of the Fund. This fee is calculated daily and payable monthly.

As portfolio manager, the Manager is responsible for managing the investment portfolio of the Fund directly or through sub-advisors. The Manager has retained Sentry Investments Inc. to act as a sub-advisor for the Fund.

The Manager is an indirect wholly owned subsidiary of Sun Life Financial Inc.

Fund Administrative Expenses

The Manager pays certain of the operating expenses of each Fund (the “Administration Expenses”) in return for a fixed administration fee paid to the Manager by each Fund (“Administration Fee”). The Administration Fee is based on the net asset value of each series of the Fund. The Administration Expenses include, but are not limited to, record keeper fees, accounting, audit and legal fees, bank and interest charges, safekeeping and custodial fees, taxes, administrative and systems costs, costs of reports to investors, prospectuses and other disclosure documents, regulatory filing fees (including those incurred by the Manager) and trustee fees

for registered plans. The amount of this charge is disclosed as a fund administrative expense in the Fund’s Statement of Comprehensive Income found in the annual financial statements (audited).

Each Fund also pays certain operating expenses directly (the “Fund Costs”). Fund Costs include: borrowing costs incurred by the Fund from time to time; costs in connection with portfolio transactions; fees and expenses payable to or in connection with the Fund’s Independent Review Committee (“IRC”); taxes payable by the Fund; and the costs of complying with any new regulatory or legal requirement imposed on the Fund. Each Fund allocates Fund Costs proportionately among its series of units. The Fund Costs that are specific to a series of units are allocated to that series. These amounts are paid out of the assets attributed to each series of units of the Fund, which reduces the return you may receive.

Series Description

The Fund offers the following series of units: A, T5, T8, F, I and O. The date of creation for all series was February 2, 2015.

Series A, T5 and T8 units are available to all investors.

Series T5 and T8 units are designed to provide investors with a fixed monthly distribution based on a target annualized distribution rate of 5% and 8%, respectively, of the net asset value per unit of the relevant series at the end of the prior year.

Series F units are available to investors who have a fee-based account with their dealer and whose dealer has signed an agreement with the Manager. Instead of paying sales charges, investors buying Series F units pay fees to their dealer for investment advice and other services. The Manager does not pay any commissions to dealers in respect of Series F units, so the Manager can charge a lower management fee.

Series I units are special purpose securities that are currently only available to other mutual funds and eligible institutional investors. Series I units are not sold to the general public. Each Series I investor negotiates its own management and advisory fee that is paid directly to the Manager.

Series O units are available to investors through the Private Client program and must be purchased through a Private Client account. Each Series O investor pays a management fee directly to the Manager and is eligible for management fee reductions, if any, based on the value of Series O units held in the investor’s Private Client account. Series O management fees are paid, after subtracting any management fee reductions, by a redemption of Series O units in the investor’s account.

⁽¹⁾ This information is provided as at December 31 of the period shown, as applicable.

⁽²⁾ Management expense ratio is based on total expenses (excluding broker commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average Net Asset Value during the period.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average Net Asset Value during the period.

⁽⁴⁾ The Fund's portfolio turnover ratio indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover ratio of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in

Sun Life Sentry Global Mid Cap Fund

the course of the year. The higher a Fund's portfolio turnover ratio in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high portfolio turnover rate and the performance of the Fund.

⁽⁵⁾ Percentages are annualized.

Management Fees

The annual maximum management fee paid by the Fund is a percentage of the average daily net asset value of each series exclusive of any applicable taxes and operating expenses, which is accrued daily and is paid to the Manager monthly in arrears. Management fees pay for portfolio and investment advisory services, oversight of any service providers, marketing and promotional activities, arranging for the distribution and sale of securities of the Fund, general administration of fund operations and sales and trailing commissions paid to dealers.

The percentages and major services paid for out of the management fees are set out below:

		As a Percentage of Management Fees	
	Maximum Annual Management Fee Rate (%)	Dealer Compensation (%) ¹	General Administration, Investment Advice and Profit (%)
Series A Units	2.00	34	66
Series T5 Units	2.00	44	56
Series T8 Units	2.00	44	56
Series F Units	1.00	—	100
Series I Units	—	—	—
Series O Units ²	1.00	—	100

¹ Includes sales and trailing commissions.

² Series O management fees are not paid by the Fund. Series O investors pay management fees directly to the manager.

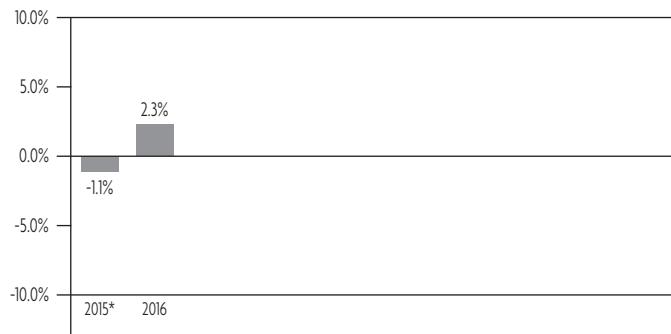

PAST PERFORMANCE

The indicated rates of return are the historical annualized and annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. Mutual funds are not guaranteed. How a fund performed in the past does not necessarily indicate how it will perform in the future.
